Professional Overview

UI/UX Designer and Front-End Developer with 1.6 years of professional experience designing and developing digital products. Strong background in problem-solving and collaborating with cross-functional teams to deliver intuitive, user-centered experiences.

Work Experience

Associate at MResult Services Pvt Ltd

Remote, July 2025 – Present

- **Legal Vendor Management System** – Conducted stakeholder interviews and drove information architecture, prototyping, and front-end development using reusable components to build a web application for a legal firm. Replaced manual spreadsheet and email-based workflows, improving spend transparency and vendor decision-making.
- **Talent Repository Platform** – Gathered requirements and produced wireframes, prototypes, and front-end development with reusable components for an HR web application covering skill tracking, capability assessment, and bench management. Reduced manual workforce-tracking effort by ~30%, giving HR a unified system for capability and availability insights.
- **Loan Management System** – Partnered with stakeholders to gather requirements, then built wireframes, prototypes, and front-end development with reusable components for a loan servicing application covering task tracking, financial reporting, and covenant monitoring. Automated manual Excel-based tracking, cutting workload by ~40%.

Intern at MResult Services Pvt Ltd.

Remote, Jan 2025 - Jun 2025

- **Financial Document Management Tool** – Conducted stakeholder interviews and led user flow mapping, wireframing, and prototyping, then built a web application front-end with reusable components. Automated a manual, folder-based filing process into a tagged, searchable system, reducing manual effort by ~60%.

Programming Languages: HTML, CSS, JavaScript

Tools: Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Framer, FigJam, Miro

Projects

BiteBuddy – Food Delivery Mobile App (Personal)

- Created a mobile food ordering experience tackling choice overload and lack of nutritional guidance, backed by user research and competitor analysis. Built the end-to-end UI/UX from user flow to high-fidelity prototypes validated through usability testing to streamline the ordering journey. [View](#)

Venula – Movie Streaming App (Personal)

- Designed a movie discovery experience that recommends movies based on mood, genre, and viewing companions, informed by user research. Delivered the complete UI/UX from wireframes to interactive prototypes for a faster, more intuitive way to find something to watch. [View](#)
